THE
RESIDENCE
COLLECTION 

Features & Benefits

The Residence Collection is pleased to announce their brand new product, a concealed trickle vent cover, in line with new legislation and tested in accordance with BS EN 13141-1.

With regulations in place since June 2022, trickle vents are a mandatory requirement for most installations (some homes may be exempt within conservation areas or listed buildings, this exemption should be applied for as part of your planning process). The dedicated trickle vent cover conveniently hides the vent from view so the stunning sight-lines of the windows and doors isn't compromised. With colour matching capabilities, they are designed to fit with The Residence Collection. And it doesn't stop there, the trickle vent also acts as a head drip to divert water away.

- ✓ The trickle vent aluminium cover is available in a range of finishes to match the window's main profile, including powder coated and foil finish.
- ✓ Tested in accordance to BS EN 13141-1.
- ✓ A number of configuration options available.
- ✓ Designed to fit with The Residence Collection's R9, R7 and R² window and door collections.
- ✓ Trickle vent cover is easily fitted to the frame prior to installation.
- ✓ Perfect for conservation areas and ensures the stunning sight-lines of the windows and doors is not compromised.
